

Our **mission** is to provide high quality service to our clients by focusing on successful problem solving and growth through innovation.

Our **vision** is to deliver creative and effective solutions and to be the best choice and long-term partner for our clients.

Our **principles** are:

- \* Consultancy by experienced practitioners only
- \* Dedication to consultancy as personal money would be invested
- \* Broadening of clients seeing field by coaching him to see the maze from above
- \* Excellence in performance
- \* Honesty, Mutual Trust & Respect

**Our goals:**

- To provide excellent training for companies and individuals
- To provide assistance in building internal support, in comprehending problems, critical issues, and in reaching efficient results
- To connect professionals to make them more productive and successful
- To create new platforms for efficient business
- To share good practice in EU project management
- To enhance sustainable development in business
- To challenge conventional thinking while maintaining an open dialogue with our clients, partners as well as our team members

**European Social Entrepreneurship and Innovative Studies Institute** is a consulting and training institution dedicated to innovative teaching methods, strategy creation and developing sustainable entrepreneurship.

The Institute activities started in 2000. We have been providing training and consulting services of the highest quality to businesses and public sector.

Our team has competencies in various fields such as sales, management, production, constructions, marketing and market studies, academic research, media, press, social and information technology sectors.

Our team members share integral, creative and analytical mind, respect for others and the ability to work with people at all levels in an organization. As we work with leading organizations across the private, public and social sectors, we feel committed to bring a unique approach and total devotion into each of our clients' engagements and investments.

We have rich experience to work with evaluation and motivation of employees. Evaluating employees with 360 evaluation we get information on each person's advantages and potential for achievements. Major goal is to achieve employees dedication to work and feel joy and satisfaction,.

Our work embraces various services: preparing business plans, investment projects, technical feasibility studies and enforcement of the market research, consultancy to the business process of modernization, competitiveness, operational efficiency, developing concepts for products and services.

Moreover, we provide our expertise in the EU partnership projects and innovation projects as well as guidelines for the absorption of the EU support, instructions on filling EU applications and administrating EU projects. We ensure effective project management and supervision of their implementation. Additionally, we bring out the capabilities of clients to fully participate in the process and lead the ongoing work.

We are passionate about making a measurable impact in all we do. We believe that progress can develop only through innovation and innovative decision-making methods in order to implement successful business or projects. Therefore, we pay attention to researches, adoption of new technology and innovation, as we believe these measures can help to overcome immense challenges that matter to our clients and, often, to the world.

We are committed to advancing the theory and practice of innovation, but we think and act more like business partners, not academic advisors. We share our clients' aspirations, invest in understanding their situation, and align our incentives with their objectives, so they know we are in this together. Our clients know we are ready to go an extra mile to support them in reaching their endeavours. Our team offers their exclusive focus and delivers measurable results, as we care about our clients' business as our own business. Application of such unique culture and approach to each client's specific situation allows us to deliver long-lasting and qualitative results.
